- Project Financials, Budgeting & Forecasting
- IT Operations, Service & Asset Management
- Cloud, Infrastructure & Enterprise Application Delivery
- Vendor, Contract & Procurement Management
- Risk, Issue, Dependency & Delivery Assurance
- Security, Regulatory Compliance & Business Continuity
- Continuous Improvement & Benefits Realization
- AI-Enabled Automation & Workflow Innovation
- Agile, Waterfall and Hybrid SDLC Delivery Practices
- Requirements, UAT & Release Management
- Microsoft Project, Jira, Azure DevOps, Smartsheet & Monday.com

PROFESSIONAL EXPERIENCE

Mars, Inc. - Mars Veterinary Health / BluePearl

Oct 2020 - Present

Senior IT Project Manager

- Took over incomplete portfolio-governance work and converted ambiguity into a repeatable operating model; led enterprise PPM tool evaluation and pilots, then matured Monday.com demand management across 128+ initiatives through standardized intake, LOE estimation, prioritization, approvals, templates, workflows, and conversion to delivery.
- Managed concurrent technology initiatives end to end through charters, resource and infrastructure planning, UAT, CAB/go-no-go, go-live readiness, hypercare, stabilization, support transition, and closeout; served as primary PM and ePMO liaison for the Voyager Health Security Program, coordinating 10 privacy, access-control, and compliance action plans.
- Partnered with executives on annual technology planning and budget forecasting and directed IT refresh and infrastructure modernization across 110+ hospitals; aligned roadmaps, dependencies, capacity, financial accountability, and success measures with business priorities.
- Facilitated steering-committee and executive portfolio reviews, translating dashboards, KPIs, RAG status, risks, dependencies, resource utilization, financials, sequencing, and trade-offs into decisions; strengthened PMO maturity through RACI and automated workflows while mentoring project managers and business stakeholders on governance practices and adoption.

U.S. Air Force Reserve

Sep 2000 - Present

Lieutenant Colonel, Director of Operations

- Lead officers and senior enlisted leaders across IT and operational functions who manage their own staff, drawing on 25+ years of military service and 18+ years of formal people leadership across teams of up to 40 and units of 60-160+ personnel.
- Conduct formal performance evaluations and make personnel decisions for officer and enlisted direct reports; personally interview, select, hire, and place leaders; address underperformance and direct career development, succession, backfill, and transition planning.
- Served as Director of Operations during a six-and-a-half-month U.S. Central Command deployment, enabling 50+ aeromedical evacuation missions and the safe transport of 220+ patients; contributed to operations recognized with the Air Force Gallant Unit Citation.
- Allocate people, equipment, funding, and operational capacity to readiness priorities; executed 99% of a \$50K operating budget, oversaw closeout of a \$393K warehouse construction project and relocation of \$3.5M in inventory, and selected a host-nation vendor whose proposal came in 20% under budget.
- Served as the primary Emergency Management and Unit Control Center representative during a deployed crisis, ensuring personnel accountability and continuity of mission support.

- Developed, organized, and executed plans using approximately \$1.8M in War Reserve Materiel across four major joint-service, national, command, and unit-level training events, achieving 100% of critical exercise goals and a cumulative 57% increase in readiness and training for 270 Airmen.
- Rebuilt medical readiness operations, raising overall readiness from 5% to 89%; separately realigned UTC personnel assignments, increasing UTC/SORTS capability by 77%; later directed self-assessment and compliance programs with zero findings across 11 programs and 135 inspection items.
- Led IT service, asset, and digital governance: supervised support operations resolving 280+ tickets; directed a technology refresh with 100% asset accountability; as appointed project officer, proposed an access-controlled SharePoint repository, standardized KPI and trend reporting, and an accountability workflow for medical-readiness and clinic-utilization processes; previously oversaw 43 programs, tracked and reviewed 55 unit processes in SharePoint, and achieved 100% participation in an enterprise data program.
- Championed establishment of a local calibration capability for mission-critical portable oxygen equipment, eliminating cross-base dependency, freeing critical aircraft pallet space for mission cargo, reducing turnaround time, improving equipment availability, and allowing personnel at the supporting installation to refocus on their own mission priorities.

U.S. Air Force - Aim High Mobile Application

May 2020 - Sep 2020

Senior IT Project Manager (Fixed-Term Assignment) | Program Governance & Executive Decision Support

- Contributed technical program-management expertise to development and deployment of the Air Force's first Total Force recruiting application and a \$4.8M modernization capability; established milestones, monitored adherence to project plans, and strengthened governance and executive reporting.
- Advised leaders on cost, schedule, technical performance, and program risk; participated in contract negotiations and changes; consulted on proposals, proposal work statements, specifications, operating budgets, and financial terms; advised specialized procurements.

PRO Unlimited - Consultant to Raymond James Financial

Jan 2020 - May 2020

Senior IT Project Manager

- Managed a \$1.5M portfolio of complex enterprise projects under ePMO standards, controlling project financials, actuals, forecasts, day-to-day budget tracking, schedules, risks, and executive status reporting.

Pitisci & Associates - Consultant to WellCare

Sep 2019 - Jan 2020

Senior IT Project Manager | Healthcare Technology Transformation

- Led cross-functional healthcare technology initiatives through hybrid delivery using Agile, Scrum, and Waterfall practices, coordinating scope, integrated schedules, resources, stakeholder expectations, risks, and executive decisions.
- Developed risk mitigation plans, escalated blocking issues, and removed delivery barriers.
- Produced weekly project-status reporting and analytics for business and technology leaders, providing visibility into milestones, schedules, resources, risks, issues, dependencies, and decisions.

ValGenesis, Inc.

May 2017 - Sep 2019

Product / Project Manager | Enterprise SaaS Implementation Leadership

- Managed up to seven concurrent customer-facing implementations of the ValGenesis Life Science Validation System in GxP-regulated environments, with budget responsibility nearing \$1M; directed distributed teams from requirements analysis and configuration through testing, release management, organizational adoption, and operational transition.
- Partnered with client executives on implementation strategy, resource priorities, risk resolution, and control of scope changes against business priorities.

The Judge Group - Consultant to JPMorgan Chase

Apr 2016 - Mar 2017

IT Project Manager | Technology Portfolio & PMO Leadership

- Directed an estimated \$2M portfolio spanning cloud platform modernization, cloud security and identity and access management, robotic process automation, and strategic service delivery capabilities.
- Managed hands-on delivery across concurrent initiatives, including project plans, resources, budgets, risks, stakeholder communications, and executive reporting; served as liaison between sponsors and stakeholders from Executive Director through Managing Director and aligned priorities with business and technology leaders.

Ashley Furniture Industries - eCommerce Systems

Sep 2014 - Feb 2016

IT Project Manager | Global eCommerce & Omnichannel PMO Leadership

- Served as lead PM for governance, delivery, and optimization of a new enterprise CMS and interdependent systems; established portfolio priorities and roadmaps while managing requirements, project plans, resources, risks, defects, and Agile/Waterfall releases ranging from 250 to 1,650 development hours.
- Produced executive reporting on portfolio performance, benefits, and value; interviewed candidates and made hiring recommendations; contributed to strong revenue growth by optimizing the company's highest-performing CMS.

KForce - Consultant to Franklin Templeton**Mar 2014 - Jun 2014***IT Project Manager | Quality & Transition Governance*

- Managed the transition of UAT project-management responsibilities to QA; created test plans, schedules, and resource plans; coordinated test-case creation, requirements and test-plan reviews, and approvals.

eMASON / CLARIFIRE, INC.**Mar 2013 - Mar 2014***IT Project Manager | Client Portfolio & Operating-Process Leadership*

- Directed concurrent software releases and client implementations through hybrid Agile/Waterfall delivery; facilitated Scrum ceremonies and backlog-grooming sessions; managed release plans, schedules, defect and issue triage, risks, and stakeholder communication while contributing to a 50% increase in assigned-client project revenue.
- Designed standardized operating processes that improved delivery efficiency by 90%; ensured customer-driven API security protocols were developed, tested, and implemented.

CIBER, Inc.**Sep 2006 - Mar 2013***IT Project Manager / Account Manager / Principal Consultant | Healthcare Technology & Client Leadership*

- Selected client engagements included Fresenius Medical Care North America (FMCNA), UnitedHealth Group (UHG), and WellCare. Advanced from project management into account and principal-consulting leadership, directing distributed U.S. and India-based matrix teams across SDLC, HDLC, vendor, financial, and supply-chain delivery for Fortune 100 clients; held contributors accountable and reassigned work when delivery risk emerged.
- Architected end-to-end release governance and a single source of truth for UnitedHealth Group's regulated core claims environment, enabling accurate quarterly and interim releases without service interruption; documented the process, led knowledge transfer, trained consultants, and delivered recommendations that helped generate new business partnerships.
- Managed recurring technology procurement over two years, executing numerous six-figure orders, including an initial order of approximately \$500K and a multi-order procurement package totaling more than \$1M.
- Led nationwide healthcare technology deployment across approximately 1,600 locations; standardized network architecture and deployment methods that cut implementation and support costs by 25%.
- Negotiated vendor pricing and warranty terms that reduced warranty-service costs by 30% while expanding coverage at no additional client cost.
- Reduced consultant onboarding time by 70% through standardized estimation practices; lowered Sarbanes-Oxley (SOX) compliance risk through stronger documentation management, tracking, accountability, and audit readiness.

Mohegan Sun Casino**Mar 2004 - Sep 2006***IT Analyst 2 - Project Leader | Technology Operations & Team Capability*

- Led infrastructure, problem-management, and service-improvement initiatives supporting a large, revenue-intensive casino and hospitality environment; improved availability and operational performance.
- Built a training program that accelerated analyst readiness, reduced onboarding time, and increased team productivity.

Foxwoods Resort Casino**Feb 2002 - Mar 2004***IT Associate Analyst | Enterprise Technology Operations*

- Delivered frontline technical and field support for critical applications and infrastructure, personally resolving hardware, software, application, and network issues while supporting enterprise assets and end-user operations.
